Abstract not available for JP 2004537871 (T)

Abstract of corresponding document: **WO 0241544 (A2)**

A backplane interface adapter with error control and redundant fabric for a high-performance network switch. The redundant fabric transceiver of the backplane interface adapter improves the adapter's ability to properly and consistently receive narrow input cells carrying packets of data and output wide striped cells to a switching fabric.
